1. DESCRIPTION
In the MX 1230 Fire Extinguishing System, discharge nozzles are used to:
• Apply the extinguishing agent within the calculated flooding time and to distribute it uniformly in the protected enclosure.
Two types of nozzles are available for the MX 1230 Fire Extinguishing System:
• 180° nozzles that spray the extinguishing agent in a semicircle around the discharge nozzles
• 360° nozzles that spray the extinguishing agent in a full circle around the discharge nozzles

2. LISTINGS AND APPROVALS
UL Listed: Clean Agent Extinguishing System Unit
FM Approved: Clean Agent Fire Extinguishing System
